POLYURETHANE
DECORATIVE MOLDING

CORNICE

CARVING CORNICE

Specification of Polyurethane Decorative Crown Molding

Product	Carving Cornice
Model Name	BB-CC 01
Material	Polyurethane (PU)
Color	White
Dimension	Depth:55mm × Height:150mm × Length:2400mm
Application	Interior and Exterior

PU Material

The density of PU materials is up to 240KG/M3, lighter than wood, but same hardness and touch feeling. It is pest control, termites and moths do not feed on PU materials.

Fire rating to achieve the national B2 level, mean burning under the flame for 10s will not burn.

FLEXIBLE

Specification of Flexible Ornamental Frieze Molding

Product	Flexi Product
Model Name	BB-CR 08/F
Color	White
Dimension	Height:124mm × Depth:14mm × Length:2400mm
Application	Interior and Exterior

Features of Flexible Product

- Fireproof. Can withstand extreme heat, through the SGS flame test
- Bendable. Flexible curved in any angle for curved architectural needs
- High toughness. Can take any curve without distortion
- Anti-impact. Dense and flexible, no damage
- Recyclable. Materials can be recycled
- Easy to install. Mostly the same installation way as the general decor ornaments
- Easy to repair. Seamless construction, smooth cross-section and easy to fill

Specification of Polyurethane Decorative Chair Rail Molding

Product	Carving Chair Rails
Model Name	BB-CR 23
Material	Polyurethane (PU)
Color	White
Dimension	Height:100mm × Depth:21mm × Length:2400mm
Application	Interior and Exterior

PU Material

The density of PU materials is up to 240KG/M3, lighter than wood, but same hardness and touch feeling. It is pest control, termites and moths do not feed on PU materials.

Fire rating to achieve the national B2 level, mean burning under the flame for 10s will not burn.

Features of Flexible Product

- Fireproof. Can withstand extreme heat, through the SGS flame test
- Bendable. Flexible curved in any angle for curved architectural needs
- High toughness. Can take any curve without distortion
- Anti-impact. Dense and flexible, no damage
- Recyclable. Materials can be recycled
- Easy to install. Mostly the same installation way as the general decor ornaments
- Easy to repair. Seamless construction, smooth cross-section and easy to fill

Specification of Polyurethane Interior Window And Door Trim

Product	Plain Chair Rails
Model Name	BB-PR 06
Material	Polyurethane (PU)
Color	White
Dimension	Height:92mm × Depth:33mm × Length:2400mm
Application	Interior and Exterior

PU Material

The density of PU materials is up to 240KG/M3, lighter than wood, but same hardness and touch feeling. It is pest control, termites and moths do not feed on PU materials.

Fire rating to achieve the national B2 level, mean burning under the flame for 10s will not burn.

Specification of Polyurethane Wall Art Ornaments

Product	Wall Ornaments
Model Name	BB-OR 151L
Material	Polyurethane (PU)
Color	White
Dimension	Height:285mm × Width:160mm × Depth:22mm
Application	Interior and Exterior

PU Material

The density of PU materials is up to 240KG/M3, lighter than wood, but same hardness and touch feeling. It is pest control, termites and moths do not feed on PU materials.

Fire rating to achieve the national B2 level, mean burning under the flame for 10s will not burn.

Specification of Polyurethane Wall Art Ornaments

Product	Wall Ornaments
Model Name	BB-OR 95R
Material	Polyurethane (PU)
Color	White
Dimension	Width:70mm × Height:100mm × Depth:7mm
Application	Interior and Exterior

PU Material

The density of PU materials is up to 240KG/M3, lighter than wood, but same hardness and touch feeling. It is pest control, termites and moths do not feed on PU materials.

Fire rating to achieve the national B2 level, mean burning under the flame for 10s will not burn.

Specification of Polyurethane Wall Art Ornaments

Product	Wall Ornaments
Model Name	BB-OR 134
Material	Polyurethane (PU)
Color	White
Dimension	Width:80mm × Height:80mm × Depth:11mm
Application	Interior and Exterior

PU Material

The density of PU materials is up to 240KG/M3, lighter than wood, but same hardness and touch feeling. It is pest control, termites and moths do not feed on PU materials.

Fire rating to achieve the national B2 level, mean burning under the flame for 10s will not burn.

Specification of Polyurethane Architectural Plinth For Pilaster

Product	Pilaster
Model Name	BB-P 220B
Material	Polyurethane (PU)
Color	White
Dimension	Width:200mm × Depth:30mm × Height:485mm
Application	Interior and Exterior

PU Material

The density of PU materials is up to 240KG/M³, lighter than wood, but same hardness and touch feeling. It is pest control, termites and moths do not feed on PU materials.

Fire rating to achieve the national B2 level, mean burning under the flame for 10s will not burn.

Specification of Polyurethane Architectural Plinth For Pilaster

Product	Pilaster
Model Name	BB-P 232
Material	Polyurethane (PU)
Color	White
Dimension	Width:287mm × Depth:60mm × Height:641mm
Application	Interior and Exterior

PU Material

The density of PU materials is up to 240KG/M3, lighter than wood, but same hardness and touch feeling. It is pest control, termites and moths do not feed on PU materials.

Fire rating to achieve the national B2 level, mean burning under the flame for 10s will not burn.

Specification of Polyurethane Carved Capitals For Pilaster

Product	Pilaster
Model Name	BB-P 224C
Material	Polyurethane (PU)
Color	White
Dimension	Width:420mm × Depth:150mm × Height:300mm
Application	Interior and Exterior

PU Material

The density of PU materials is up to 240KG/M³, lighter than wood, but same hardness and touch feeling. It is pest control, termites and moths do not feed on PU materials.

Fire rating to achieve the national B2 level, mean burning under the flame for 10s will not burn.
